Jekto®M-5

1 component airless injection machine

Jekto®M-5 is a light, powerful and very reliable injection device with electric drive. The machine is suitable for injecting low-viscosity injection materials with a sufficiently long working time.

Advantages

- **Simple operation and easy transport**
- **With electric motor**
- **Injection pressure continuously adjustable**
- **Rinsing device**

Special advantages of these very reliable pumps are the low weight, the electric drive and the easy maintenance and handling.

Technical data

Jekto®M-5		
Pump	Airless pump	
Drive	electric	
Max. delivery rate	1,9 l/m	
Motor power	0,65 kw	
Max. Pressure	220 bar	
Reservoir	6 l	
Electrical supply	230 V AC - 50 Hz	
Weight	Rack: 15 kg	
Dimensions	with rack: 450 x 460 x 550 mm	
Trolley	No	
Rack	Jes	-

The machine is supplied complete with 10 m delivery hose and ball valve and is ready for immediate use.

These technical information describe the present-day state of knowledge these product. They should only inform about the possibilities of application and could not release the applicator of his commitment to check the possibility to use the product for the required application. Information for processing can be found in processing instructions of our product. Information about safe handling can be found in our current safety data sheet.
