EQUIPMENT CLEANER

cleaning agents for injection pumps, coating tools,
dissolving of cured resins, removal of oil and
grease

Professionell cleaning agents for injection pumps. Neither smelly, nor dangerous. Trouble-free pump operation is essential at site. HydroSolv and HydroMoll guarantee perfect equipment care. They are suitable for all types of machines. Such as injection pumps, spray pumps and casting equipment. HydroClean solves cured resins and is often the last chance to get equipment running again, in case of unplanned curing events. ARCAN cleaners remove Polyurethane, Epoxy, PMMA resins as well as oil and grease.

EQUIPMENT CLEANER
