JOINT FILLING AND SEALANT

joint sealants and fillers, for dilatation and construction joints. Elastic, waterproof and self levelling.

Joint sealants and fillers are Polyurethane, PMMA or Hybrid resins for filling and sealing. The elastic resins seal working joints, dilatation joints in floors or civil engineering. They are self-levelling or thixotropic for slopes. With excellent chemical resistance for indoor and outdoor use. The advantage of the Rokryl PMMA resins is the application at low temperatures.

JOINT FILLING AND SEALANT

PRODUCT NAME Rokryl 326

TECHNOLOGY

PMMA Resin Casting Resin Flexible UV Resistant

PRODUCT NAME Rokryl 326-Thix

TECHNOLOGY

PMMA Resin Casting Resin Flexible UV Resistant

APPLICATION

Joint, Crack Sealing Working Joints Dilatation Joints On Concrete On Screed

APPLICATION

Joint, Crack Sealing Working Joints Dilatation Joints On Concrete On Screed

BENEFIT

Self-Levelling Elastic UV Resistant No Yellowing Super Adhesion Cures < 0°C Fast Curing

BENEFIT

Thickened – Thixoptopic Elastic UV Resistant No Yellowing Super Adhesion Cures < 0°C Fast Curing

PRODUCT NAME Rokryl Fuge 340 NV

PRODUCT NAME

PRODUCT NAME

DuroFlex 676

HYBRIDUR 357

TECHNOLOGY

Acrylate Resin Joint Filler Self-Levelling Rigid

TECHNOLOGY

Hybrid Mastic

Non Swellable

TECHNOLOGY

Casting Resin

UV Resistant

Flexible

PUR

APPLICATION

Joints, Crack Sealing Contact Grouting For Natural Stone For Artificial Stone For Concrete

APPLICATION

Joint, Crack Sealing Working Joint Sealing Dilatation Joint Sealing Flexible Filling, Sealing

APPLICATION

Joint And Crack Sealing In Natural stones In Concrete In Screed In Asphalt BENEFIT

Self-Levelling Build In Primer System UV Resistant No Yellowing White Cured After 10 Minutes Rigid

BENEFIT

Easy Handling No Primer Required Humid Surfaces Stable

BENEFIT

UV Stable No Yellowing Flexible High Strength Super Adhesion
