FOAM FOLLOW UP

post-injection or second injection after waterstop
foam for permanent waterproofing

Foaming resins such as waterstop resins are very popular and regularly bring good success in stopping running water. Particularly 1-component waterstop foam is used a lot and often the necessary post-injection is dispensed with.

A second injection with a non-foaming resin is important, as waterstop foam is always only a temporary seal. Water can penetrate through the pores and the leakage occurs again. Therefore, it is recommended to use a solid non-foaming injection resin for the second injection.
There are different types of injection resin available for post-injection. Rigid, flexible and swellable systems. The swellable resins have a special position, as they are able to repair themselves and thus prevent a new leakage.

FOAM FOLLOW UP

PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc PU 500	PUR Resin 1 Component Pump	Crack Injection Working Joint Sealing Honeycomb Concrete Injection Injection Tube Injection Waterstop Flexible Filling, Sealing Foam Follow Up Waterproofing Injection	Swellable Elastic Self-Repair Effect

PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc PU 506	PUR Resin 1 Component Pump	Crack Injection Working Joint Sealing Honeycomb Concrete Injection Injection Tube Injection Waterstop Foam Follow Up Waterproofing Injection	Elastic Low Viscous Excellent Penetration Excellent Adhesion
PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc PU 507 E	PUR Resin 1 Component Pump	Crack Injection Working Joint Sealing Honeycomb Concrete Injection Injection Tube Injection Waterstop Foam Follow Up Flexible Filling, Sealing	Elastic Low Viscous 2 in 1 Resin
PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc Integral 575	PUR Resin 1 Component Pump	Crack Injection Canal, Shaft Repair Feedthrough Sealing Foam Follow Up Working Joint Sealing Honeycomb Concrete Injection Injection Tube Injection Waterstop Waterproofing Injection Flexible Filling, Sealing	Integral Technology 1 Comp. Resin Ready To Use Swellable Elastic 100% Solid Self Repair Effect
PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc Injekt 583	Acrylate Resin 1 Component Pump	Crack Injection Facade Injection Canal, Shaft Repair Feedthrough Sealing Foam Follow Up Working Joint Sealing Honeycomb Concrete Injection Injection Tube Injection Waterstop Waterproofing Injection	Excellent Penetration Low Temperature Use <0°C Swellable Elastic Corrosion Prevention Cleaning With Water Non Foaming Solid Resin-No Gel Suitable For Humidity
