SURFACE HYDROPHOBISATION

impregnation against driving rain on facade and wall

Surface hydrophobisation materials keep walls dry, clean and save money. The protection against driving rain, keep facades dry and avoid ugly green coating and the adhesion of dust and dirt. Dry isolation material require less heating to keep warm. Efflorescence and frost damages are in the past. With HydroBloc SI impregnations, the choice is to be made between water based or solvent based liquid hydrophobisations or a creamy material with excellent penetration skills.

SURFACE HYDROPHOBISATION

PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
HydroBloc SI 700	Max. Moisture 60%	Horizontal Barrier Surface Hydrophobisation Raising Damp Prevention Primer	Ready To Use Solvent Free Strengthening Silification Hydrophobisation
PRODUCT NAME	TECHNOLOGY	APPLICATION	BENEFIT
Kieselsol 701	Max. Moisture 60%	Horizontal Barrier Surface Hydrophobisation Raising Damp Prevention Primer	Ready To Use Solvent Free Strengthening Silification Hydrophobisation

PRODUCT NAME HydroBloc SI 740	TECHNOLOGY Cream Water Based	APPLICATION Surface Hydrophobisation Surface protection Deep ground	BENEFIT Surface Protection Alkaline Resistant Paintable With Dispersion Paint Solvent Free Excellent Penetration Water Vapour Permeable No Film
PRODUCT NAME HydroBloc Si 741	TECHNOLOGY Solvent Based	APPLICATION Surface Impregnation Surface Protection	BENEFIT Surface Protection Alkaline Resistant Excellent Penetration Water Vapour Permeable No Film Non-Sticky
PRODUCT NAME HydroBloc Si-742-K aqua	TECHNOLOGY Water Based	APPLICATION Hydrophobisation Surface Protection	BENEFIT Surface Protection No Film Non-Sticky Energy Saving Clean Surface
PRODUCT NAME SiliBond 971	TECHNOLOGY Reactive Silicate Crystalline Technology Hydrophobic	APPLICATION Surface Strengthening Coating – Permeable Protective Layer Surface Hydrophobisation Concrete Stabilisation Concrete Protection Curing Pore filling	BENEFIT Concrete Hardening Concrete Stabilisation Stain Protection No Film Formation Concrete Looks Like Concrete Hydrophobisation
