B-POX 0480

injection and casting resin with long setting time

B-Pox S-0480 a multipurpose Epoxy resin for injection, casting and consolidation. The low viscosity and solvent free recipe comes with a long setting time and doesn't shrink. The controlled low exothermic reaction even in thick layers and voluminous casting parts make B-Pox S-0480 the first choice for casting condensers, transformers or other electronic elements. Films made of B-Pox are clear, tack-free, rigid but not brittle.

B-POX 0480

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
No Shrink	Contact Grouting	1 Component Pump	Injection Packer	DOWNLOAD TDS
Low Exothermic Reaction	Internal Strengthening		Injection Pump 1 Component	REFERENCES
Clear	Casting Resin For Electronic		Jekto Gun 078 Liquid	
Tack Free			Drill Hole Mortar	
			Injection Mortar	
			Equipment Cleaners	
			Trennfix	
			Silox Thix Agents	
			Screed Bracket 075
