BLOCSIL 790

top coat sealant and protective coating for floors
and walls

BlocSil 790 is a protective coating for floors with high abrasion resistance and clear appearance. It is shiny but also available as matt finish. The 1 component methacrylate system connects with the surface, which gives a superb adhesion. BlocSil 790 creates a protective film against abrasion, de-icing salt, stains and traces coming from hot tyres that usually leave ugly marks. Beside the application on concrete, screed, natural and artificial stones the topcoat is suitable for the protection of Epoxy coatings against white scratches. The reuse on already treated surfaces after proper cleaning is possible. BlocSil products are made for non-industrial used surfaces. Other BlocSil and PowerSeal products are available with anti-slip finish and even higher abrasion resistance.

BLOCSIL 790

BENEFIT

Clear
Shiny
No Yellowing
Permeable
1-Component
Solvent Free
Film Formation

APPLICATION

Coating – Permeable
Abrasion Protection
Stain Protection
Protection Against Dust
Creation
Protection Against De-Icing
Salt
Protection For Epoxy
Coatings

INSTALLATION

Paint
Roll
Spray

ACCESSORIE

Cleaning Agents For Surface
Epoxy Coatings
Borox Paintstripper 1031
