CALSOL 1021

nano disperse chalk paint for healthy room
climate

Chalk is one of the oldest paintings known by humanity. For some years now, he has been experiencing a renaissance as healthy housing construction material. Lime paint is very durable, emission-free and vapour permeable, regulates humidity and provides a healthy indoor climate. The mineral coating kills germs and mould spores. Calsol 1021 the way to healthy, ecological living and regulates humidity.

CALSOL 1021

BENEFIT

Healthy Climate
No Germs
No Mold
Spores
Emission Free
Regulates Humidity

APPLICATION

Special Paint
Indoor & Outdoor Paint
Dehumidification
Ecological Living
Coating- Permeable

INSTALLATION

Manual
Spray
