CALSOL 1021

Nano-Dispersed Lime Paint for Breathable Walls

Calsol® 1021 is a mineral lime paint with high water-vapour permeability. The mineral coating supports moisture exchange between the substrate and the surrounding air. Its naturally alkaline mineral composition creates conditions that are less favourable for mould growth.

CALSOL 1021

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Mineral Lime Paint	Special Paint	Manual	Fluat Building Protection	REFERENCES
High Water-Vapour Permeability	Indoor & Outdoor Paint	Spray	Horizontal Barrier	
Supports Moisture Exchange	Dehumidification
