CEMBOND M-945

slurry waterproofing for walls and floors

Cembond M-945 is a waterproofing slurry for sealing floors and walls. The cementitious-based slurry comes with Cembond Technology for super adhesion and easy application. Cembond polymer reacts actively with the cement, this cross-linking is no longer removable. ARCAN slurries are waterproof without hindering the water vapour permeability. They areas stand-alone solutions or as add-onto horizontal barrier treatment or waterproofing injection.

CEMBOND M-945

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
