DUROFLEX-678 PRO

exceptional topcoat, protection against stains, uv-
light, abrasion and chemicals

DuroFlex-678 Pro is a clear protective coating for Polyurethane and Epoxy coatings where the topcoat prevents the coating actively from yellowing. Applied on natural and artificial stone DuroFlex-678 Pro is a perfect stain protection. Used on screed (cement, anhydrite and magnesite) as well on mastic asphalt it increases the abrasion protection. The excellent chemical resistance, the clear and matt appearance, make it the first choice for abrasion protection. Even in weathered areas, DuroFlex is uv resistant and won't yellow.

DUROFLEX-678 PRO

BENEFIT

Active Uv Protection On
Coatings
Matt Finish
Transparent
TopCoat On Coatings
TopCoat On Concrete,
Screed
TopCoat On Natural
Stones

APPLICATION

Coating – Permeable
Stain Protection
Abrasion resistant
UV Protection for coatings

INSTALLATION

Roll

ACCESSORIE

Epoxy Coatings
Polyurethane Coatings
Cleaning Agents For
Surfaces
