DUROFLEX PRIMER 900-P3

special primer for liquid latex membrane Silox 903-DF used on old roofing films

DuroFlex Primer 900-P3 is the primer used for surface preparation for the liquid latex membrane Silox 903-DF made for roof waterproofing especially on old existing roofing films. The primer prepares sucking surfaces and prevents damages coming through highly suck able surfaces. For other surfaces like old epoxy or higher strains like biogas plants, more sophisticated products are available. DuroFlex Primers are available for many surfaces.

DUROFLEX PRIMER 900-P3
