DUROX CARBOMESH 163

carbon fibre reinforcement with carbon mesh

Durox Carbomesh 163 is a carbon mesh for structural reinforcement. Durox Carbomesh is made of pure carbon fibre yarns. Typical applications are by the enhancement of seismic resistance, structural strengthening and load capacities. Carbomesh is suitable for concrete, masonry, metallic and wooden structures. Especially complex geometric shapes and confined spaces are easy to laminate. The use on flat or shaped surfaces is effortless. High mechanical resistance opens up a wide range of applications. Carbomesh is available in different weights per m² for various loads. A proper surface preparation with Silex 961 is essential.

DUROX CARBOMESH 163

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Cling To All Shapes	Adhesive Reinforcement	Glued	Cembond EPW 863	DOWNLOAD TDS
High °C Resistance	Cracked Surface Repair			REFERENCES
Electrical And Thermal Conductivity	Shock And Vibration Absorption			
Fatigue Resistant	Earthquake Protection			
High Tensile Strength
