GEOROCK 181

cement free geomortar for repair

GeoRock 181 is a natural cement free geomortar for surface reprofiling in repair, coating and renovation. The smooth texture of GeoRock 181 is easy workable and sticks to all mineral surfaces. Adhesion is excellent and the waterproof surface is abrasion resistant. The fast setting allows early use of the treated areas. Typical applications are concrete repair, levelling of mineral surfaces, wear protection and waterproofing.
