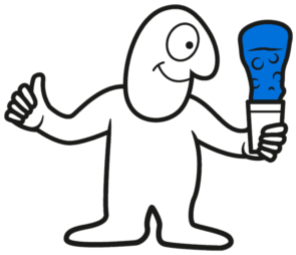
HYDROBLOC 510

waterstop foam, fast reaction, 1-component, high foam ratio



HydroBloc 510 waterstop foam for stopping fast-flowing water and water infiltrations. The microporous foam is excellent for solidification and stabilisation in tunnel and mining or special civil engineering. Rapid reaction combined with high foam ratio and low viscosity, contribute to excellent sealing results. HydroCat 514 adjusts the reaction behaviour such as speed and foaming capacity. An addition of 1 – 4% is sufficient for excellent sealing results. Use HydroBloc PU resins for post injection, for permanent waterproofing.

HYDROBLOC 510

BENEFIT
High Foam Factor
Micro Pores
Rapid Reaction
Fast Setting
Stable

APPLICATION
Waterstop
Soil, Rock Stabilization
Cavity Filling
Waterproofing Injection

INSTALLATION
1 Component Pump
Hand Gun

ACCESSORIE
Injection Packer
Injection Pump 1 Component
Jekto Gun 078 Liquid
Drill Hole Mortar
Equipment Cleaners
Trennfix
HydroBloc 575 Integral
HydroBloc PU 500
HydroBloc PU 506
HydroBloc Injekt 583
