HYDROBLOC 516

injection foam for waterproofing and stabilisation,
2-comp.

HydroBloc MS-516 is fast and tough foam resin for waterproofing and stabilisation of loose soil and rock. Filling and sealing of big cracks and big joints is easy. The excellent foaming capacity of 20 litres and the fast reaction combined with high compressive strength make HydroBloc MS-516 perfect for material for sealing, stabilisation and filling.

HYDROBLOC 516

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Rigid Foam	Waterstop	2 Component Pump	Injection Packer	DOWNLOAD TDS
Fast Reaction	Filling Wide Cracks		Injection Pump 2	REFERENCES
Waterproof	Filling Wide Joints		Component	
High Foam Ratio	Cavity Filling		Drill Hole Mortar	
Tough	Soil, Rock Stabilisation		Injection Mortar	
High Compressive Strength	Waterproofing Injection		Equipment Cleaners
