HYDROBLOC INTEGRAL 575

swellable ready to use injection resin for
waterproofing and waterstop

HydroBloc 575 Integral is a unique waterproofing injection resin. Integral is synonym for ready to use injection resins. No mixing, no accelerating, non-foaming! Open the lid and start successful work. The water swellable resin with auto repair effect adjust changes in joint or crack cross sections automatically. This is where rigid and non-swellable resins usually fail. Swellability is not equal to foaming. Swelling happens after final curing, when the material gets water contact. Integral resins are no gels! They never shrink below their original size and stay flexible. HydroBloc 575 Integral is an excellent choice for crack injection, joint sealing, honeycomb sealing, injection tube injection and building element waterproofing. Leakages and usual waterstop, are easy jobs for HydroBloc 575 Integral. Integral 575 is suitable for dry, humid and wet conditions and even waterstops. Integral technology saves time, money and reduces material consumption.

HYDROBLOC INTEGRAL 575

BENEFIT

Integral Technology
1 Comp. Resin
Ready To Use
Swellable
Elastic
100% Solid
Self Repair Effect

APPLICATION

Crack Injection
Canal, Shaft Repair
Feedthrough Sealing
Foam Follow Up
Working Joint Sealing
Honeycomb Concrete
Injection
Injection Tube Injection
Waterstop
Waterproofing Injection
Flexible Filling, Sealing

INSTALLATION

1 Component Pump
Hand Gun

ACCESSORIE

Injection Packer
Injection Pump 1 comp.
Drill Hole Mortar
Injection Mortar
Waterstop Mortar
Sealing Slurry
Komprischaum 130
Equipment Cleaners
