HYDROBLOC POLYGEL 530

acrylate gel for waterproofing injections

HydroBloc Polygel 530 is a waterproofing resin for gel curtains. A gel curtain is a waterproofing between building and soil. The membrane protects the building from any water contact. Typically used for slab sealing, wall sealing and pipe repair. HydroBloc Polygel 530 is a hydrogel made of acrylic polymers. Contained water is stored in polymer structure but not chemically bonded. This special storage structure is advantageous; it enables the gel to keep the water inside, even under pressure and mechanical strain. Polygel is not sponge like!

HYDROBLOC POLYGEL 530

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Setting Between 10s – 120 Minutes	Waterstop Curtain Injection	1 Component Pump 2 Component Pump	Injection Packer Injection Pumps	DOWNLOAD TDS REFERENCES
Excellent Penetration	Foundation Pit Sealing		Drill Hole Mortar	
Controlled Swellability	Joint Sealing		Injection Mortar	
Easy Processing	Crack Injection		Waterstop Mortar	
Non Toxic	Canal, Shaft Repair		Hydrox AK 1011	
Chemical Resistance	Tunnel Injection		HydroBloc Polyblend 540	
Mechanical Resistance	Waterproofing Injection		SiliBlend 535.2
