HYDROBLOC PU 506

elastic injection resin for waterproofing and tube injection

HydroBloc PU 506 elastic injection resin for waterproofing. Excellent penetration into fine cracks and structures make HydroBloc PU 506 the first choice for crack injection, joint sealing, honeycomb sealing, injection tube injection and building element waterproofing. PU 506 is suitable for dry, wet and humid conditions and if accelerated with HydroCat the material is an excellent waterstop as well. The elastic and solvent free injection resin is 100% solid. User friendly mixing ratio (1:1) and long processing time for 1 component pump use, make working with HydroBloc PU 506 easy and comfortable. The low viscous resin hardens even in thin layers trustworthy.

HYDROBLOC PU 506

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Elastic	Crack Injection	1 Component Pump	Injection Packer	DOWNLOAD TDS
Low Viscous	Working Joint Sealing	2 Component Pump	Injection Pump 1	REFERENCES
