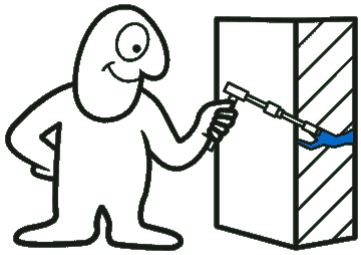
HYDROBLOC PU 641-T

injection resin for waterproofing, soil stabilisation, tunnelling and mining



HydroBloc PU 641-T fast setting injection resin for waterproofing, ground enhancement, soil stabilisation and strengthening in tunnelling and mining. A 10% volume increase pushes the resin additional further into the soil and rock structure. The cured product is a tough elastic polyurethane plastic with excellent adhesion properties and cut ability by a TBM. The difference between PU 641 and PU 641-T is the flowing ability. PU 641-T is thixotropic and the pasty consistence is perfectly for filling wide gaps and cracks.

HYDROBLOC PU 641-T

BENEFIT
Rapid Curing
High Strength
Thixotropic
Excellent Adhesion
Foaming

APPLICATION
Tunnel Face Consolidation
Tunnel umbrella injection
Tunnel Face Pre-injection
Soil, Rock Stabilization
Cavity filling
Waterstop
Contact Grouting
Tunnel Consolidation

INSTALLATION
2 Component Pump

ACCESSORIE
Injection Packer
Injection Pump 2 Component
Drill Hole Mortar
Injection Mortar
Equipment Cleaners
Trennfix
