HYDROBLOC SCHAUM 1200

2-comp. injection foam - waterproofing and stabilisation in tunnelling and mining

High-speed PUR foam for waterproofing and stabilization injections. Main tasks are soil strengthening and stabilization of loose soil, rocks and pebbles in tunnelling and mining. The slight foaming and fast setting PUR resin is perfectly suitable for dry and wet surroundings. The low viscosity enables penetration into fine structures.

HYDROBLOC SCHAUM 1200

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Low Viscous	Waterproof Injection	2 Component Pump	Injection Packer	DOWNLOAD TDS
Fast Reaction	Cavity Filling		Injection Pump 2	REFERENCES
Good Foaming Capacity	Waterstop		Component	
Excellent Penetration	Soil, Rock Stabilization		Drill Hole Mortar	
	Tunnel Face Consolidation		Injection Mortar	
	Tunnel Umbrella Injection		Equipement Cleaners	
	Tunnel Face-Pre-Injection
