HYDROBLOC SCHAUM 1201

2-comp. Injection foam for waterproofing and stabilisation in tunnelling and mining

High-speed self-extinguishing PUR foam for waterproofing and stabilization injections in coal mining. Main tasks are soil strengthening and stabilization of loose soil, rocks and pebbles in tunnelling and mining. The slight foaming and fast setting PUR resin is perfectly suitable for dry and wet surroundings. The low viscosity enables penetration into fine structures.

HYDROBLOC SCHAUM 1201

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Self Extinguishing	Coal Mining	2 Component Pump	Injection Packer	DOWNLOAD TDS
Low Viscous	Cavity Filling		Injection Pump 2	REFERENCES
Fast Reaction	Waterstop		Component	
Good Foaming Capacity	Soil, Rock Stabilisation		Drill Hole Mortar	
Excellent Penetration	Tunnel Face Consolidation		Injection Mortar	
	Tunnel Umbrella Injection		Equipement Cleaners	
	Tunnel Face-Pre-Injection
