HYDROBLOC SI 709

horizontal barrier against raising damp,
concentrate for 99% water saturation

HydroBloc SI-709 is the most effective liquid horizontal barrier. The waterproofing against raising damp prevents water from entering the wall. The reactive siloxane concentrate is suitable for all water saturation grades and of course solvent free. Pressure less injection with Tröppel containers (bottles) are suitable till 50% water saturation, above that level pressure injection is mandatory.

HYDROBLOC SI 709
