HYDROBLOC WPS 750

paint for wet walls, indoor and outdoor

HydroBloc WPS 750 is a paint and coating for wet and humid walls. The decorative layer is waterproof and breathable, which allows the dehumidification. A primary treatment of raising damp or other waterproofing is not mandatory but recommended. HydroBloc WPS 750 prevents efflorescence and water spots. In and outdoor use on concrete, plaster and brick is suitable. HydroBloc WPS 750 can replace restoration plaster or used as on top coating on such systems as decorative protection coating.

HYDROBLOC WPS 750
