HYDROFLEX DICHTBAND 275

flexible membrane for waterproofing cracks and joints

HydroFlex Dichtband 275 is a foil membrane system for masking working joints, movement joints, structural component connections and cracks. Masking is suitable for inside and outside application and seals against pressing and standing water. In new buildings and renovation. HydroFlex Dichtband 275 is made of a non-ageing thermoplastic elastomer (EVA) and available in different sizes. The glue Silipox Baukleber 826 is suitable for humid surfaces. HydroFlex 275-S is a special glue for flexible tape with tape connections.
