HYDROFLEX DICHTBAND 276

flexible membrane for waterproofing cracks and joints

HydroFlex Dichtband 276 is a foil membrane system for masking working joints, movement joints, structural component connections and cracks. Masking is suitable for inside and outside application and seals against pressing and standing water. In new buildings and renovation. HydroFlex Dichtband 276 is made of a non-ageing EPDM and available in different sizes. The glue Rokryl Kleber 319 is also suitable for < 5°C and Silipox Baukleber 826 is a glue for humid surfaces.
