HYDROTAPE QUELLFUGENBAND

swellable rubber tape for joint sealing

HydroTape Quellfugenband is a rubber tape for construction joints and working joint sealing for engineering structures and tunnelling. The swelling tape is suitable for water and salt water and for aqueous substances. The swelling process is reversible and still functions reliably after years. Swelling pastes and adhesives supplement the waterproofing system.

HYDROTAPE QUELLFUGENBAND

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Reversible Swelling	Working Joint Sealing	Glued	HydroColl 430	DOWNLOAD TDS
Flexible	Construction Joint Sealing		HydroSeal 355	REFERENCES
Form Stable	Precast Elements			
Swellable In Salt Water	Feedthrough Sealing			
Swellable In Aqueous Substances
