JEKTO GUN 080 FUGENPISTOLE

mortar and joint gun, fills masonry joints with
different shaped nozzles

Jekto Fugenpistole 080 is suitable for manual application of mortar and filling of masonry joints. The hand pump comes with 4 different nozzles, from fine to wide for precise filling. A joint scratcher and a mixer. Suitable mortars are Durox Kleber 986 and SealFix Expansionsmörtel 930. The difference between Jekto gun 051 Fugenpistole and Jekto gun 080 is the length of the nozzle. Jekto gun 051 Fugenpistole is perfectly made for filling deep holes and drilling holes from the bottom to the top.
