JEKTO M-3

electric one component injection pump for one component injection resins or slow setting resins

Jekto M-3 is a 1-component injection pump for injection work. The membrane pump powered by electricity and the light weight of just 23 kg makes Jekto M-3 the ideal companion for waterproofing injection. The single component pump is perfectly suitable for all types of resins with a long setting time, waterstop foam, horizontal barrier and Integral resins. Jekto M-3 is available on a trolley or rack.

JEKTO M-3
