JEKTO SCHNECKENPUMPE M-6

screw pump for mortar and cement based materials

Jekto Screw Pump M-6 is a powerful but still handy machine for pump and spray application of mineral suspensions with a max grain size of 2 mm. The following materials require a screw pump for application. Injection cement, sealing slurry and joint compounds, typically used in structural preservation and building reconstruction.

JEKTO SCHNECKENPUMPE M-6
