KIESELSOL 701

silification and hydrophobisation

Kieselsol 701 is a classic horizontal barrier system for capillary water stop. Kieselsol 701 operates with two modes of action. Silification and hydrophobisation of pores and capillaries. In the same step, the material strengthens weak joint mortars. Kieselsol is a horizontal barrier, a surface hydrophobisation, a wonderful primer for plaster and paint and it strengthens the treated surfaces.

KIESELSOL 701

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Ready To Use	Horizontal Barrier	1 Component Pump	Injection Packer	REFERENCES
Solvent Free	Surface Hydrophobisation	Pressureless Tröppel	Injection Pump 1	
Strengthening	Raising Damp Prevention	Flood	Component	
Silification	Primer	Spray	Drill Hole Mortar	
Hydrophobisation			Injection Mortar	
			Injection Bottles	
			Fluat Building Protection	
			Restoration Plaster	
			Restoration Paint
