KORRODUR 1106

Direct to metal water based anti-corrosive coating

All in one solution in rust preventing. Latest generation of water based solvent free coating made as anti-corrosion layer. Direct to metal coatings are state-of-the-art in binder research and coating development. Just one and the same material is used as primer, coating and top coat. All colours in matt or shiny appearances are available.

KORRODUR 1106
