PLANFLOOR 595

silicate injection resin for consolidation, uplifting and stabilisation

Planfloor 595 is a hybrid resin made of Silicate and Polyurethane. Excellent stability, durability and adhesion qualify Planfloor 595 for consolidation and uplifting of floor slabs, traffic areas and foundations. HydroBloc OM 595 is a non-foaming resin with controlled reaction for precise uplifting, without damages due to uncontrolled foaming reactions. What you see is what you get, perfect filling and precise work.gndt

PLANFLOOR 595

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Controlled Reaction	Underpinning, Lifting	2 Component Pump	Injection Packer	DOWNLOAD TDS
Non-Foaming	Tunnel Consolidation		Injection Pump 2	REFERENCES
Precise Handling	Cavity Filling		Component	
Shrink-Free	Soil, Rock Stabilization		Drill Hole Mortar	
	Contact Grouting		Injection Mortar
