POWERSEAL 744

impregnation repels oil, grease and stains

PowerSeal 744 is the best stain protector for mineral surfaces, like ceramics, concrete, screed, granite and marble. The protection against oil, grease and dirty water is perfect. Treated surfaces are water and oil repellent, polluted water can't any longer carry dirt inside and into the underground. The solvent free formula hinders the penetration of pollutants and protects from stains. The impregnation is invisible and breathable without closing pores. The perfect protection against splashes from Barbeques, ketchup and red wine accidents on balconies and terraces. The protection against oil, greasy substances or just dirty water on stairs and windowsills, just removed with water. Later coating with BlocSil 790 is possible in case addition protection is required.
