ROKRYL 325

PMMA coating for floors, flexible, self-levelling

Rokryl 325 is a PMMA floor coating with self-levelling effect. The coating is flexible and durable and cures even at low temperature. Rokryl 325 coating is suitable for decorative useable areas or industrial floors. The material is suitable for indoor and outdoor application. Rokryl 325 spreads easily and comes with a perfect surface finish and fast curing.
