ROKRYL INJEKT 327

PMMA injection resin low viscous

Rokryl Injekt 327 a PMMA resin for contact grouting and casting. Crack, joint and void injection in concrete and screed are easy with low viscous Rokryl Injekt 327. Rapid curing and workability below 0°C combined with easy processing; make Rokryl Injekt 327 the first choice as glue and sealing compound.

ROKRYL INJEKT 327

BENEFIT

Low Viscous
Fast Setting
Low Temperature Use
<5°C
UV Stable

APPLICATION

Crack Injection
Working Joint Sealing
Casting Resin
Needling
Contact Grouting

INSTALLATION

1 Component Pump

ACCESSORIE

Injection Packer
Injection Pump 1
Component
Jekto Gun 078 Liquid
Drill Hole Mortar
Equipment Cleaners
Trennfix
Silox Thix Agents
