ROKRYL RAPID 332-THIX

non smelling, fast setting thixotropic repair mortar for concrete

Rokryl Rapid 332- thix is a stable repair mortar for concrete. The fast setting repair mortar is designed for repair of industrial floors and landing strips, where time and availability matter. Rokryl Rapid 332- thix is loadable after 10 minutes, even in frost. The PUMA resin is non-smelling and doesn't need a primer and sticks to humid surfaces. The excellent abrasion resistance plus the resistance against oil, fuel and de-icing salt makes Rokryl Rapid 332- thix the ideal use as grout mortar. The thixotropic version, is specially suitable for sloping areas. Only sucking surfaces need a primer based on the same material system which cures in a few minutes time, the name Rokryl Primer 554

ROKRYL RAPID 332-THIX
