SILEX 962

reprofiling mortar for smoothing uneven or cracked concrete

Silex 962 is a reprofiling and smoothing compound for uneven or cracked concrete surfaces. The soft plastic mortar sticks perfectly to the surface and is easy to process. Application in thin layers directly on the concrete or on top of the filling mortar Silex 961. The cementitious mortar contains fibres, polymers and microsilicates. Silex mortars don't shrink and harden strain free, they are suitable for walls.

SILEX 962

BENEFIT

Shrink Free
Super Adhesion
Cembond Polymer
Technology
Fibre Reinforced
Contains Microsilicates
Strain Free Hardening

APPLICATION

Concrete Repair
Repair Mortar
Smoothing Mortar
Uneven Concrete Surfaces
Cracked Concrete Surfaces

INSTALLATION

Trowel

ACCESSORIE

Cembond 956
Silex 961
Silex 963
