SILEX 963

fine spatula for smoothing rough surfaces and as end coating

Silex 963 is a fine spattle / putty for smoothing rough surfaces or as final coating on reprofiling mortar Silex 961. The soft plastic mortar sticks perfectly to the surface and is easy to process. The cementitious mortar contains fibres, polymers and microsilicates. Silex mortars don't shrink and harden strain free, they are suitable for walls.
