SILEX TSM 934

Trass mortar for indoor and outdoor use

Silex TSM 934 is a trass cement mortar, made for strained masonry and soil contact. The use as laying mortar, for natural or artificial stones and ceramic, is indoor and outdoor possible. Silex TSM 934 is waterproof and won't efflorescence. The high initial strength, together with weather and frost resistance, is perfect for the repair of historical monuments.

SILEX TSM 934
