SILEX TZM 936

PCC trass mortar

Silex TZM 936 is a PCC mortar and laying mortar, made of trass, cement and a polymer component. The use as laying mortar, for natural or artificial stones and ceramic, is indoor and outdoor possible. Silex TZM 936 is waterproof and won't efflorescence. The high initial strength, together with weather and frost resistance, is perfect for the repair of historical monuments. Silex TZM 936 is particularly light and pleasant to work with.
