SILEX FLUAT 944

pre-treatment for wet walls, removes salt and mould

Silex Fluat 944 is a highly efficient building protection material. It removes salt, prevents efflorescences, mould and mildew and neutralises building materials. After the use of Silex Fluat 944 the typical mouldy smell of basements and rooms with wet walls disappears fast and permanently. Concrete and cement bound materials will be chemically condensed, solidified and hardened due to crystalline creation. Additional benefit is the reduced moisture absorption and the protection against oil and grease.

SILEX FLUAT 944

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
Salt Remover	Surface Cleaning	Brush	Horizontal Barrier	DOWNLOAD TDS
Mould Remover	Surface Strengthening		Drill Hole Mortar	REFERENCES
Mildew Remover	Desalination		Injection Mortar	
Solidification	Fungicide		Injection Packer	
Abrasion Resistance				
Anti Flowering
