SILEX WATERPLUG 932.1

waterstop mortar, medium speed

Water stop mortar for stopping fast flowing water. Silex Waterplug 932.1 hardens without crack formation. Application on vertical or horizontal surfaces without sluice danger. Silex Waterplug 932.1 cures in 2-3 minutes and used as paste for sealing of little leakages, cracks and joints. The use of additional sand elongates the reaction time.
