SILIBLEND 535.2

mineral additive for a new acrylate gel experience,
swellable stone

SiliBlend 535.2 is a mineral additive compound for HydroBloc Polygel 530. The additive creates an amazing product with new features. The result is a swellable stone. The fast reacting mixture is perfectly suitable for stopping heavy rushing water. The cost efficient material is easily pumpable and suitable to fill small and big cavities with a stable material with excellent adhesion. SiliBlend 535.2 is versatile applicable as injection product and as spray application for surface sealing, such as tunnel linings.
