SILIBOND 697

flexible, clear polyurethane injection resin and coating

Silibond 697 is a light and weather resistant coating and injection resin. The advantage of the flexible, low viscous resin is the clear appearance, without any yellowing in uv light. This feature is a big advantage for the injection of facades and hollow screeds and all other places where appearance matters. Clear coatings made of SiliBond 697 are flexible and water resistant. The use in pools or ponds is possible.

SILIBOND 697

BENEFIT	APPLICATION	INSTALLATION	ACCESSORIE	PRODUCT INFO
UV Resistant	Facade Injection	Paint	Cleaning Agents For Surfaces	DOWNLOAD TDS
Weather Resistant	Stain Protection	Inject	Injection Pump 1 Component	REFERENCES
Underwater Resistant	Hollow Screed, Tiles	Roll	Drill Hole Mortar	
Flexible	Clear Coating		Injection Packer	
	Crack Injection			
	Flexible Filling, Sealing
