SILIBOND SI 711

silicate gel with drinking water certificate

SiliBond SI 711 – Silicate injection gel for waterproofing in civil engineering such as sealing horizontal areas like excavation pits and stabilisation of gravel and loose soils. Silibond replaces soluble sodium silicate injection gels. SiliBond SI comes with a drinking water certificate and is free of ecologically harmful substances. The water glass typical high alkalinity is eliminated in Silibond SI 711.

SILIBOND SI 711
