SILOX 861 D

epoxy mortar for surface reappear on floors

Silox 861 D is a special epoxy mortar for floors. The high strength glue and smoothing compound is an excellent coating material and waterproofing. The permeable mastic is suitable for wet surfaces. Used as glue and sealant for concrete pipes, and manholes as well as adhesive for natural and artificial stones. Silox 861-D is made for floor application. The sister product Silox 860-D is thixotropic for wall application. For coloured surfaces, use Silox EPW 857.
