SILOX BAUHARZ 834

epoxy resin for building applications with extraordinary adhesion and GFK laminates

Silox Bauharz 834 is the perfect resin for casting machine foundations, poles and anchor steels in wet and dry conditions. The adhesion to many materials is extraordinary. Mortars made of Silox Bauharz 834 are tough elastic and stick free and connect perfectly with fresh concrete. The use as casting resin or grout opens a wide range of application possibilities such as repair mortar, flowing mortar in coating applications or polymer mortar for overhead applications. The sister material SiloxBauharz 835 comes with a lower viscosity and faster curing which comes in handy at lower temperatures.

SILOX BAUHARZ 834

BENEFIT

Excellent Adhesion On Wet Surfaces
Adhesion On Metal
Adhesion On Many Plastics
With Silox Thix Agent
Overhead Application
Cured Mortar Is Tough
Elastic And Stick Free

APPLICATION

Repair Mortar
Coating Mortar
Casting Mortar
Anchor Mortar
Bonding Agent Between Concrete
Casting Machine Foundations

INSTALLATION

Manual

ACCESSORIE

Surface Cleaning Agents
HydroSolv 520
Silox Thix Agent
Screed Bracket 075
