SILOX EPW 856

epoxy primer for humid surfaces

Silox EPW 856 is a transparent Epoxy resin impregnation, also suitable for humid surfaces, suitable for breathable and non-breathable floors. Used as bonding bridge or primer below Epoxy coating resins or as performance improvement of concrete floors. Impregnations or coatings made of Silox EPW 856 are breathable and won't hinder the dehumidification of the concrete.

SILOX EPW 856

BENEFIT

Permeable
Water Dilutable
For Wet Surfaces
Impregnation
