SILOX EPW 858

epoxy coating for damp surfaces, self-levelling

Silox EPW 858 is a self-levelling Epoxy coating resin, also suitable for wet or breathable floors. Layers of 5 mm thickness are possible in one working step. Floors made of Silox 858 are non-shiny and without reflexions. The beautiful, dust free and mechanical resistant coating is perfect for supermarkets, technical rooms, laboratories and storage rooms. Beside cement screed, application on magnesite- and anhydrite screeds is possible.

SILOX EPW 858

BENEFIT

For Wet Surfaces
Self Levelling
Silk Matt

APPLICATION

Coating - Permeable
Protective Coating
Decorative Coating
For Industrial Floors
For Warehouses
For Laboratories

INSTALLATION

Tooth Trowel
